### ABOUT US

The Real Estate Councils of Texas (RECstx) is a statewide coalition formed to monitor and advocate on legislative issues that impact the commercial and industrial real estate development industry.

Our members include accountants, appraisers, architects, asset managers, attorneys, bankers, brokers, designers, developers, engineers, planners, title, finance professionals and more. **Our industry generates more than \$270.6 billion in total economic activity and \$3.8 billion in state tax revenue.**

### LEGISLATIVE PRIORITIES FOR THE 89TH TEXAS LEGISLATURE

RECstx advocate for policies that allow us to build the infrastructure that supports our growing state, including:

#### AFFORDABILITY

Legislation to improve predictability in the development process, eliminate unnecessary regulations, ensure reasonable fees, and encourage diverse housing options for all Texans.

#### ECONOMIC DEVELOPMENT AND RESPONSIBLE GROWTH

Economic incentive programs to attract development and new business to Texas and other tools to stimulate the economy, strengthen property rights, and promote responsible and sustainable development without undue regulation.

#### INFRASTRUCTURE

Forward-thinking and flexible legislation to address our state's transportation and mobility needs, water storage and access, a reliable electric grid, and emergency infrastructure for all Texans.

#### PROTECTION OF PRIVATE PROPERTY RIGHTS

Preservation of existing protections, such as Chapter 245 of the Texas Local Government Code (Vested Rights) and the Private Real Property Rights Preservation Act (PRPRPA).

#### TAX POLICY

A moderate, balanced, and stable tax structure that creates the positive business climate necessary for Texas to compete in a world economy.
